THOE

THE DATE

How the fair meets the workshop

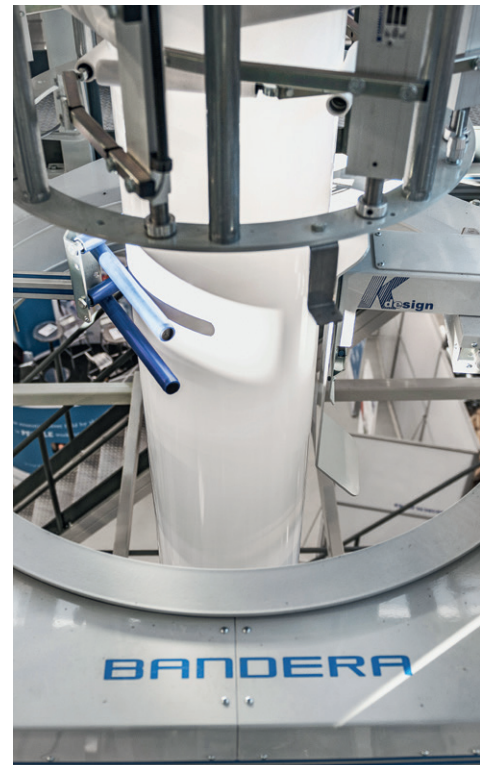

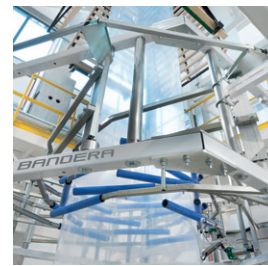

The traditional spring Exhibition for the Plastics and Rubber Industries, held at **Fiera Milano** from Tuesday **29th May** to Friday **1st June 2018**, is the opportunity to forge knowledge of innovative technologies into extrusion, packaging and converting industries.

Throughout the whole fair period visitors can easily reach Bandera R&D Center, from **HALL 15 - BOOTH A/B 121/122** to Busto Arsizio.

Bandera **THOE - The House Of Extrusion®** is only fifteen minutes from the fair; the following extrusion lines will be shown:

- **Newly-manufactured Blown Film extrusion lines:**
 - Five-layer polyolefin-dedicated PO⁵ line, ensuring higher hourly outputs than 1000 kg, useful film width 2600 mm dedicated to flexible packaging and converting industry
 - FFS line with production output up to 360 kg/h dedicated to Heavy Duty Bags Industry
- **A full extrusion line for RIGID PET, PP and PLA FILM** distinguished by a gross output rate of 1200 kg/h, useful film width 1450 mm and thickness range between 0.14 and 1.5 mm
- **Various machinery and full components and appliances** of extrusion lines specifically intended for **Agriculture Blown Film** and **Geoliner Blown Film** for civil and industrial waterproof system
- **The new PURE®** pretreatment equipment which assures new process with an official NOL already issued by FDA, to run recycled materials in rigid packaging films for food contact

On Friday 1st June, all the **Bandera Customer Service team** will be available for a whole day dedicated to the up-to-date and enhanced concept of **Bandera Customer Care**.
